

# Refund and Add Tips Through Transafe

## ^ Table of contents

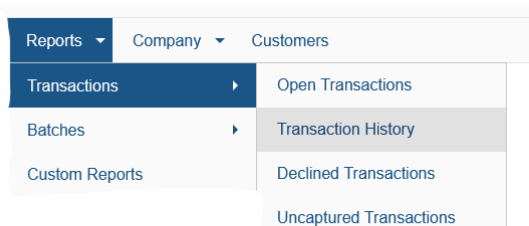

- Refund
- Adding Missed Tip

If you need to process a refund or add a missed tip through TranSafe, the process is fairly straightforward.

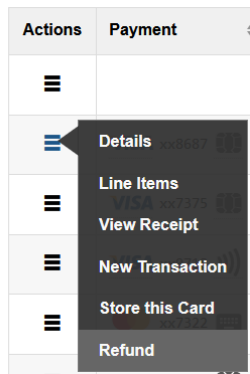

💡 Refunds and adding tips can be done easily through the POS system, this is just for those situations **where EOD was already ran** and tips need to be added or refunds need to be given.

## Refund

- Log into TranSafe Dashboard
- Navigate to **Reports > Transactions > Transaction History**

- In the transaction list, click on the 3 line menu all the way to the left for the target transaction.

From here, you can choose **Refund** to refund the transaction in part or in whole.

## Refund

Referencing prior transaction: 1234567890123456

Original Amount: \$12.34

Refund a customer card with the card present. If the card is not present, please find the original charge in the reports and submit the Refund from there.

Amount

Please enter the **full transaction amount, including tax** in the Total Amount field. The separate tax field is for reporting purposes.

Total Amount

Tax Amount

☐ Tax Exempt

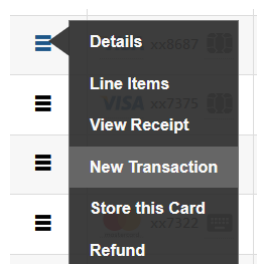

Here you can insert the total and tax amount to be refunded.

❗ You will not be checking tax exempt unless the transaction was originally tax exempt (which is a rare case)

If you are refunding a customer in full for a full amount (ex. if they were given the wrong check) be sure to put in the full amount in for total, nothing in for tax, and check tax exempt

## Adding Missed Tip

From the same 3 line menu, you can also select **New Transaction** to add a missed tip

Select "**Sale**"

New Transaction from TTID

2200070070000.0

Please select a transaction type.

Sale

Refund

Auth Only

If you are just adding a tip, put the tip amount in the **Total Amount** field , and **DO** check tax exempt.  
Leave the tip and tax amount blank.

Sale Transaction

Summary

Referencing prior transaction: 2200070070000.0

Charge a customer card and capture immediately.

Amount

Please enter the **full transaction amount, including tax and tip** in the Total Amount field. The separate tax and tip fields are for reporting purposes.
